22C-6 – ASSEMBLING AND SENDING SP-DAPD PACKETS

Disability packets containing forms filled out by client or CWD will initiate a disability referral. SP-DAPD uses these forms and other information in its disability evaluation process.

1. PREPARING THE PACKET

A. LIMITED REFERRAL

*A limited referral packet contains
The following forms:*

MC 221

Disability Determination and Transmittal, and the reason for limited referral shown in "Remarks" section.

*Submit Only Under These
Circumstances.*

1. Copy of prior MC 221, if available.

1. When packet is sent within 30 days of SP-DAPD's decision for a reevaluation and no new treating sources are alleged.

2. When an earlier onset date on an approved case is needed, if within 12 months of application, and no new treating sources are alleged for earlier onset date.

NOTE: If SP-DAPD is unable to establish an earlier onset date with information available, it may return the case as a Z56 to request additional information.

3. When client is discontinued from Title XVI due to income or resources and not in receipt of Title II benefits. This includes those who were entitled to IHSS prior to being discontinued from SSI due to earnings.

4. When application is made on behalf of deceased client and appropriate documentation of death is sent.

NOTE: If death certificate is not available, MC 220 signed by appropriate next-of-kin should be sent.

5. When after a diligent search attempt with SSA, MEDS or IEVS to obtain SSI case status, and the CWD still is unable to verify receipt of SSI benefits, CWD may request only verification of SSI benefits for IHSS purposes from SP-DAPD.

MEDI-CAL ELIGIBILITY PROCEDURES MANUAL

NOTE: Before sending packet to SP-DAPD, CWD must annotate on the MC 221 why information was unobtainable. Packets without this information will be returned as a Z56 to CWD.

*A full referral packet contains
The following forms:*

MC 179
